

Classes used in the Repository Pattern

EFDbContext

```
using System.Data.Entity;

namespace YourProjectName.Models
{
    public class EFDbContext : DbContext
    {
        public DbSet<_____> _____s { get; set; }
    }
}
```

EF_____Repository

```
using System.Collections.Generic;

namespace YourProjectName.Models
{
    public class EF_____Repository : I_____Repository
    {
        private EFDbContext context = new EFDbContext();
        public IEnumerable<_____> _____s
        {
            get { return context. _____s; }
        }
    }
}
```

I_____Repository

```
using System.Collections.Generic;

namespace YourProjectName.Models
{
    public interface I_____Repository
    {
        IEnumerable<_____> _____s { get; }
    }
}
```
