

# Creating a Video

Go to <https://screencast-o-matic.com/>.

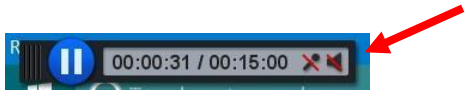

You *don't* have to create an account. Click on "Start Recording for Free" and then "Launch Free Recorder". This will download a file and you may have to click on the file to install the recorder software.

Adjust the frame to show almost all of your screen and then click the red "Rec" button in the left corner.

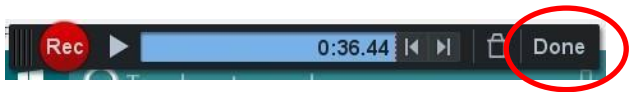

Record what I have told you to record on the previous page. Keep the sound and microphone off.

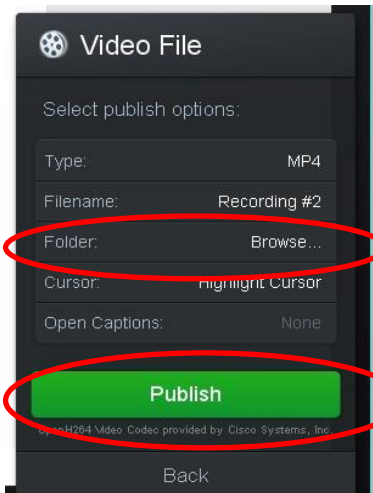

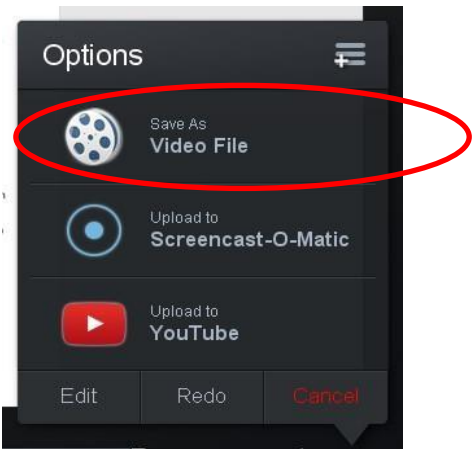

Now click the blue pause button:

Then click "Done":

Choose "Save as Video File". (You can choose Redo if you want to start the recording over.)

← Choose where you want to save the file. Then click "Publish", then "Done".

Submit the video to the assignment in Canvas.
